Oilbrushers #2 Stand Display (Stand with paints)

The Oilbrusher is the ultimate and revolutionary modeling product. Oilbrusher contains high quality oil paint specifically formulated for modeling use, diluted to the perfect consistency to be applied straight from the jar. The cap has an exclusive built-in high-precision brush to apply the color directly onto your model, without having to put the oil paint on a palette or a piece of cardboard. This evolution prevents the oil from drying out and wasting product unnecessarily. Furthermore, the modern container includes a dispenser-cleaner system that removes the excess paint from the brush, leaving just the right amount in the tip.
